MERN Stack Developer with solid knowledge of React, Node.js, MongoDB, and Express. Skilled in responsive UI, API development, and creating functional full-stack projects.

Projects

ChatGpt Clone

A MERN-based ChatGPT Clone with secure authentication, real-time messaging, long-term memory, and organized chat history. Features include login/signup, JWT protection, and a clean interface for smooth AI conversations, providing reliable, personalized, and scalable user interactions.

- **live Project** :- <https://zen-ai-c6b4.onrender.com/login>
- **GitHub** :- <https://github.com/shoaibquraishi06/chatGPT>

Micro-services

Built a scalable e-commerce platform using microservices with secure login, product listing, ordering, add-to-cart, payment integration, notifications, and a seller dashboard—improving reliability, flexibility, and overall user experience.
